Subject: **Welcome to Current Web Contents from Thomson Scientific**
Date: September 13, 2006 7:24:02 AM CDT
To: <webmaster@eserver.org>

Greetings!

You are publishing important, high-quality material on the Web. For this reason, Thomson Scientific has selected your web site at <http://www.eserver.org/> for inclusion in *Current Web Contents*[™] (<http://scientific.thomson.com/products/cwc/faq/>), a selection of scholarly web sites complementing the journal coverage in *Current Contents Connect*[®], the *Web of Science*[®], and other *ISI Web of Knowledge*SM applications.

ISI Web of Knowledge is a dynamic, fully integrated research environment. It is a platform built on a foundation of quality that includes stringent and objective content selection standards, unmatched depth of backfiles, and true cited reference searching. The high-quality content available to researchers includes data from more than 22,000 journals, 23 million patents, 12,000 conference proceedings, 5,000 books, 2 million chemical structures, and 5,500 scholarly web sites.

Rigorous selection criteria and high standards for our data quality have made Thomson Scientific a leader in the information industry.

Thomson Scientific developed high selection standards (<http://scientific.thomson.com/free/essays/selectionofmaterial/cwc-criteria/>), specialized to the medium, for *Current Web Contents*, our ever-growing collection of high-quality, scholarly web sites. Thomson Scientific Web Content Editors have visited your site, reviewed it, developed a standardized descriptive record, written an abstract, and created a link from *ISI Web of Knowledge* to your site.

We welcome you to this prestigious database, and we invite you to include on your site the *ISI Web of Knowledge* logo. To obtain this logo, go to <http://www.isiwebofknowledge.com/cwc.html>.

We look forward to working with you in the future. If you have any questions, contact us at current.web.contents@thomson.com.

Sincerely,

Web Content Editors
